

# TASK 1.1

## Screenshot 1

## You did it!

You've successfully created a project with **Vite** + **Vue 3**.

### Documentation

Vue's [official documentation](#) provides you with all information you need to get started.

### Tooling

This project is served and bundled with **Vite**. The recommended IDE setup is **VSCode** + **Vue - Official**. If you need to test your components and web pages, check out **Vitest** and **Cypress / Playwright**. More instructions are available in [README.md](#).

### Ecosystem

Get official tools and libraries for your project: **Pinia**, **Vue Router**, **Vue Test Utils**, and **Vue Dev Tools**. If you need more resources, we suggest paying **Awesome Vue** a visit.

### Community

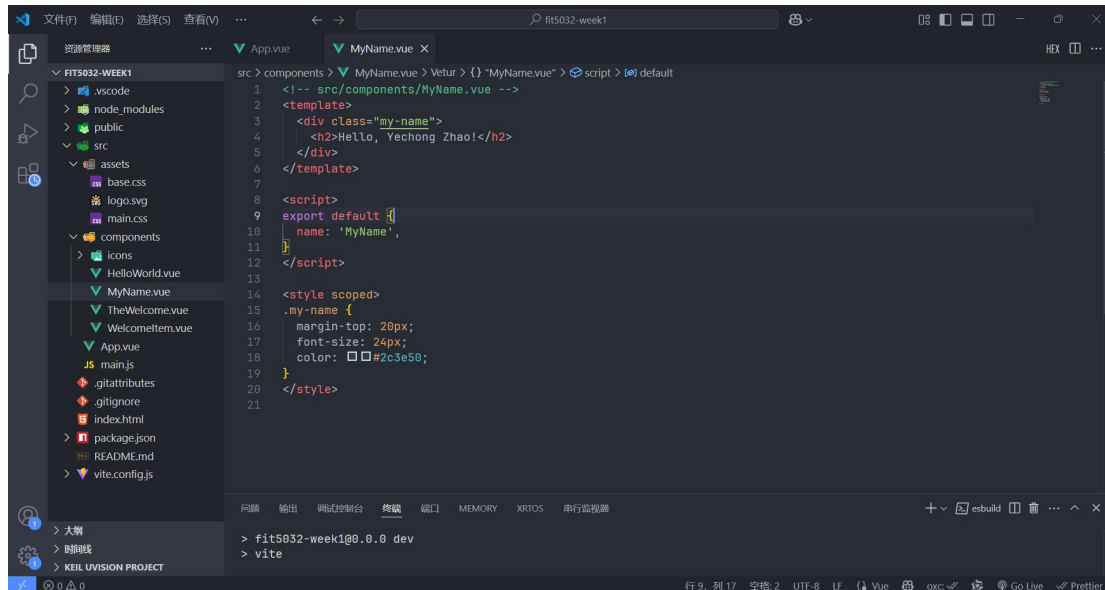

Got stuck? Ask your question on [Vue Land](#) (our official Discord server), or [StackOverflow](#). You should also follow the official [@vuejs.org](#) Bluesky account or the [@vuejs](#) X account for latest news in the Vue world.

### Support Vue

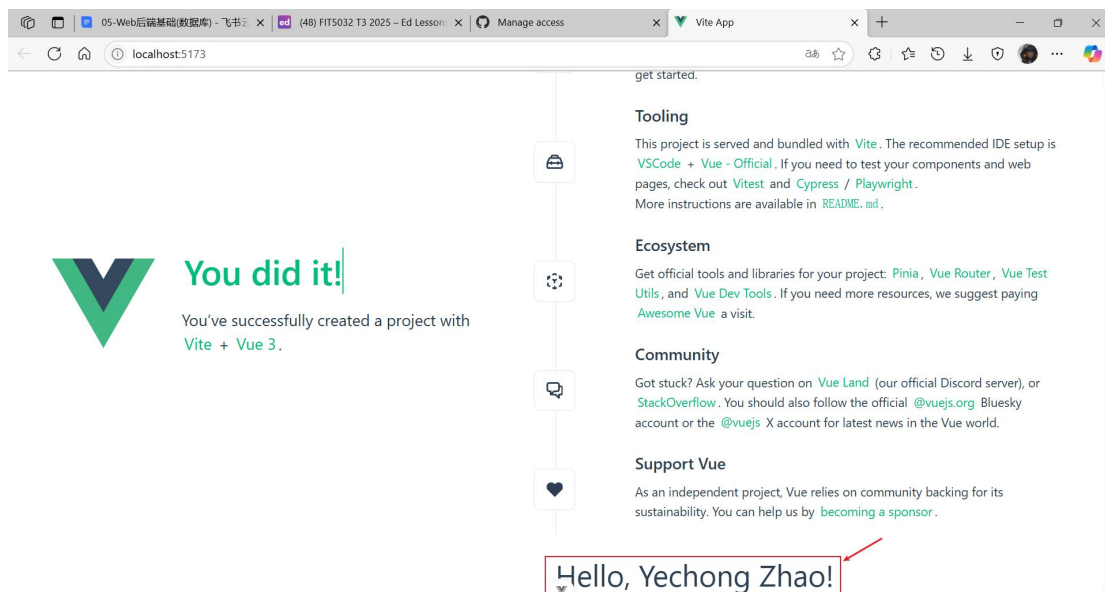

As an independent project, Vue relies on community backing for its sustainability. You can help us by [becoming a sponsor](#).

# TASK 1.2

## **Descriptions on how did you engage with peers**

Today I finished adding the MyName.vue component to my Vue project. It now shows my name on the welcome page. Although it was a simple task, it helped me understand how to create and use custom components in Vue. I ran into a small issue with the import path at first, but fixing it made the process more rewarding.
